TESTIMONIALS

CONGO, SWEETEST MAID, FAR EAST, BIRD OF PARADISE were outstanding. CONGO bulblets germinated 100%. MAINLINER made a beautiful spike and at digging time it made 100 bts. Although your originations are not the only ones I grow, your originations are better than most and that includes those from — Mr. Pearson, Harvey, Ill.

The bulblet of RARE CHINA I bought several years ago bloomed last summer for me and it was spectacular. — Mrs. Zurey, Miami, Florida

Among the seedling bulbs I bought from you I found some beauties. A beautiful bright red, a ruffled near black, a ruffled pale pink, a ruffled rose, a triangular ruffled cream and other beauties. There were 42 separate color combinations in the collection. — Mrs. Bell, Santa Rosa, Calif.

Received the bulbs today and before I get too busy planting I want to express my feelings. These are by far the best bulbs I have gotten from any bulb grower and I bought bulbs from all over. Thanks for the extras. — Mr. Nelson, Hamilton, N. Dak.

Never have I grown such wonderful glads as those I bought from you. I had so many compliments and none believed I grew them until they saw them grow in my garden. — Mrs. Possner, Murrysville, Penn.

I always look forward to growing your fine bulbs into quality spikes, which they always seem to produce. Your Sweetest Maid and Hit Parade are two of the finest varieties I ever raised. — Mr. Hardman, Temple City, Calif.

JOAN OF ARC

(400 Lins 1961)

A big new white that is really white. Husky 56" non crooking plants with 22 bud heads. Last summer from large bulbs about 50% made good spikes with from 10 to 13 florets open at a time.

This is not "THE" perfect glad, some spikes come with misplaced florets but Joan of Arc, can and does make exhibition spikes.

It might be a good idea to buy selected bulblets and grow your own acclimated stock. It is definitely worth the effort because under ordinary unpampered field conditions here, we have never grown a white that can produce such big many open spikes as can Joan of Arc.

TESTIMONIALS

We ordered quite a few glads from you last year and we never had such a display of beautiful bloom. They were all lovely but I think I enjoyed Sweetest Maid and Bird of Paradise the best. We made corsages of Bird of Paradise. People did not believe they were glads but some form of orchids. — Mrs. Goodson, Fort Worth, Tex.

I appreciated the extras you tucked in with my order. Until the glads I bought from you bloomed I had no idea there were such magnificent ones. — Mrs. Slagle, Martinsville, Virginia

MAINLINER is a dandy. In 1961 I detected a strong fragrance in it. — Dr. Dooley, Bowling Green, Ky.

You sent me some of the best peony roots I ever had. If your glad bulbs are anything like your peonies I want to get on your list of customers. My glad order enclosed herewith. — Mrs. Parker, N. Y.

Find enclosed our order for more of your beautiful glads. They are far better than any we have been able to purchase in this area. — Mr. and Mrs. Schmutzler, Oregon.

PARADISE HYBRIDS

Paradise Hybrids are an entirely new type. They have flat wide open Poinsettia shaped bloom, all petals being about equal size. They have a pink or red ring in the center of the flower and have bent stamens. They are new versions, in new colors of the famous Bird of Paradise. They have thick bristly buds and because the flower head is not too long, they are excellent makeup material. For corsages, just pin them on, they are as beautiful as orchids.

Why Should We Plant Peonies?

HERE ARE SOME REASONS

They are rated among the most beautiful of all plants, both in plant and flower. They are easy to grow. Magnificent flowers may be produced with less care than that given almost any other flower, though they well repay reasonable loving attention. It is long-lived. An established plant will live and bloom for many years.

They Are Hardy In Every State In The Union And In All Of Canada

They may be grown in beds, borders or gardens by themselves or with other plants. They make attractive specimen plants on the lawn or in the garden. The blooms are large, showy, of many forms and colors and long lasting. Many varieties are deliciously fragrant. Disease and insects rarely bother them. They make excellent cutflowers and give beautiful landscape effects. In short it is one of the most useful, beautiful, versatile, and altogether satisfactory plants known.

IT IS TRULY THE KING OF FLOWERS!
